37.720.90 - White

HOW TO TAKE CARE OF YOUR POWER BANK?

Charge it once in a while – If the device is not to be used for a long time, charge it at least once a month so as to prevent damage and not affect its charging capacity.

Do not disassemble it – Never open or disassemble this device just to check the inside.

Keep it dry – Water causes damage to this device.

Do not connect any device while charging – This may cause the power bank to over-heat or may cause technical damage to your device.

Avoid dropping it – Try to look for a protective case as additional protection for this gadget.

37.771.90 - White

David Bowie

was born in South London on January 8, 1947. His first hit was the song "Space Oddity" in 1969. The original pop chameleon, Bowie became a science fiction character for his breakout Ziggy Stardust album. He later co-wrote "Fame" with John Lennon which became his first American No. 1 single. An accomplished actor, Bowie starred in The Man Who Fell to Earth in 1976. In addition, he produced albums for many artists, such as Lou Reed and Iggy Pop. He was inducted into the Rock and Roll Hall of Fame in 1996. In 2006 he received a Grammy Lifetime Achievement Award.

Packing: 60/1

37.601.10 - Black

37.601.90 - White

A great grandfather of the Selfie Stick, a “telescopic extender” for compact handheld cameras was patented in the U.S. in 1983. A Japanese selfie stick version was featured in a 1995 book of 101 Un-Useless Japanese Inventions. Canadian inventor Wayne Fromm patented his “Quik Pod” in 2005 and selfie sticks have been available in the United States since at least 2011. The product was listed in Time magazine’s 25 best inventions of 2014.

Polo is a team sport played on horseback. The objective is to score goals against an opposing team. Players score by driving a small white plastic or wooden ball into the opposing team's goal using a long-handled mallet. The traditional sport of polo is played at speed on a large grass field up to 274 meters long by 146 meters wide, and each polo team consists of four riders and their mounts. The modern game lasts roughly two hours and is divided into periods called chukkas. Polo is played professionally in 16 countries. It was formerly, but is not currently, an Olympic sport.

HUMMINGBIRD

Did you know?

- the hummingbird is the smallest bird and also the smallest of all animals that have a backbone
- they have no sense of smell
- because the hummingbird can rotate its wings in a circle, they are the only bird that can fly forwards, backwards, up, down, sideways and hover in mid air
- they are the second largest family of birds with 343 species
- they can beat their wings up to 80 times a second during normal flight and up to 200 times per second during a courtship dive
- the hummingbird has a heart rate that can reach up to 1,260 beats per minute
- percentage wise, the hummingbird has the largest brain of all birds (4.2% of its total body weight)
- they have very weak feet and use them mainly just for perching

Hippocrates of Kos

(c. 460 – c. 370 BC)

was a Greek physician and is considered one of the most outstanding figures in the history of medicine. He is referred to as the "Father of Western Medicine" in recognition of his lasting contributions to the field as the founder of the Hippocratic School of Medicine. This intellectual school revolutionized medicine in ancient Greece, establishing it as a discipline distinct from other fields with which it had traditionally been associated (theurgy and philosophy), thus establishing medicine as a profession. Hippocrates and his ideas are referred to even today. The 'Hippocratic Oath' is a historical practice where doctors take oaths and swear to follow and practice medicinal paths ethically.

Who Invented Touch Screen Technology?

It's hard to believe that just a few decades ago, touchscreen technology could only be found in science fiction books and film. Historians consider the first touch screen to be a capacitive touch screen invented by E.A. Johnson at the Royal Radar Establishment, Malvern, UK, around 1965 - 1967. The inventor published a full description of touch screen technology for air traffic control in an article published in 1968.

Picasso's Full Name Has 23 Words

Born in Málaga, Spain, in 1881, Pablo Picasso became one of the greatest and most influential artists of the 20th century and the creator of Cubism.

Picasso was baptized Pablo Diego José Francisco de Paula Juan Nepomuceno María de los Remedios Cipriano de la Santísima Trinidad Martyr Patricio Clito Ruíz y Picasso. He was named after various saints and relatives. The "Picasso" is actually from his mother, Maria Picasso y Lopez. His father was named Jose Ruiz Blasco.

In opera, *Verismo* (meaning “realism”, from Italian *vero*, meaning “true”) was a post-Romantic operatic tradition associated with Italian composers such as Pietro Mascagni, or Giacomo Puccini.

Some authors have attempted to trace the origins of verismo opera to works that preceded *Cavalleria rusticana*, such as Georges Bizet’s *Carmen*, or Giuseppe Verdi’s *La traviata*.

Napoleon's Real Name Wasn't Napoleon

Napoleon's birth name was Napoleone di Buonaparte. Corsica had been part of France for just one year when he was born. The Buonapartes were descended from Corsican nobility, and little Napoleone was born in Casa Buonaparte, which had been in the family since the 1600s. In his twenties and with a military career to think about, he changed his name to the more French-sounding Napoleon Bonaparte. But for the rest of his life, Napoleon was associated with the backward and provincial reputation of Corsica. Napoleon's nicknames courtesy of the British included "The Little Corsican" and "The Corsican Dictator".

CUBAN TOBACCO

When Cuba became a Spanish colony in 1511, the colonists began to cultivate tobacco more systematically and to establish tobacco plantations, or Vegas, as they were known. In 1717, the Spanish king introduced a tobacco monopoly, which meant that the Cubans would cultivate the tobacco and then send it to Spain where the cigars would be manufactured. When the monopoly was abolished one hundred years later, the Cuban tobacco industry began to flourish again.

Many of today's best-known cigar firms were founded in the 1800s, including Partagos (1827), H. Upmann (1844), La Corona (1845) and Romeo Y Julieta (1850).

LION – DID YOU KNOW?

The lion (*Panthera leo*) is one of the five big cats in the genus *Panthera* and a member of the family *Felidae*. Most lions found in the wild live in southern and eastern parts of Africa. Lions are the second largest big cat species in the world (behind tigers). The average male lion weighs around 180 kg while the average female lion weighs around 130 kg. Lions can reach speeds of up to 81 km/h but only in short bursts because of a lack of stamina. The roar of a lion can be heard from 8 kilometers away. Lions in the wild live for around 12 years. Lionesses are better hunters than males and do most of the hunting for a pride. In the wild, lions rest for around 20 hours a day. Lions are the national animal of Albania, Belgium, Bulgaria, England, Ethiopia, Luxembourg, the Netherlands and Singapore.

WHAT IS WELLNESS?

Wellness and good health have historically been seen as a freedom from disease; thus, if you weren't sick, then you were considered healthy. This historical perspective on wellness is changing. While virtually everyone agrees that absence of illness is a primary component of being healthy, it doesn't however indicate anything about your state of well-being.

As a state of health, wellness is closely linked to your lifestyle and the choices you make. Each individual has a responsibility to themselves to provide for the essentials of good health – that being proper weight control, good nutrition, physical activity and exercise, and controlling of health risk factors such as tobacco, alcohol and drug use and/or abuse. These things all have a role in wellness.

What causes frost?

Frost forms in much the same way as dew forms. Frost usually forms when a surface cools through loss of infrared radiation to a temperature which is colder than the dew point of the air next to the surface, and the temperature of that surface is below freezing (32 deg F, or 0 deg. C). The source of this moisture is water vapor contained in the air.

INSTRUCTION MANUAL

1. Before setting the time, please rotate pointer for 360° (return it again to zero) and then return it back to time you want to set, where maximum is 60 minutes and minimum is 1 minute.
2. After the pointer reaches starting position, kitchen timer will stop. Light ticking will continue after that for 20 to 30 seconds more and then it will fully stop.

What Is A Tannin?

Tannins are naturally occurring compounds that exist inside grape skins, seeds and stems. The scientific word for these compounds is polyphenols. Polyphenols release from the skins, seeds and stems when they soak in the grape juice just after the grapes have been pressed and are what give certain wines their characteristic dryness or astringency. You experience the effect of tannins any time you drink a wine that creates a drying sensation in your mouth.

Gymnasium (ancient Greece)

The gymnasium in Ancient Greece functioned as a training facility for competitors in public games. It was also a place for socializing and engaging in intellectual pursuits. The name comes from the Ancient Greek term *gymnós* meaning "naked". Athletes competed nude, a practice said to encourage aesthetic appreciation of the male body and a tribute to the gods. Gymnasia and Palestreae (wrestling schools) were under the protection and patronage of Heracles, Hermes and, in Athens, Theseus. Through recognition by the Greeks of the strong relation between athletics, education and health, gymnasium became connected with education on the one hand and medicine on the other. Physical training and maintenance of health and strength were the chief parts of children's earlier education.

WHY SHOULD ONE HAVE A CONFERENCE BAG?

Well, there are two main reasons:

- * they are practical
- * they are fashionable

First off, by putting everything in a bag you are emptying your purse or pockets. Modern business person can not carry everything she or he needs in pockets or purses. It can get uncomfortable if you have a big wallet or a big cell phone. And if you have a tablet PC or an eBook reader, then... you get the idea. There are dozens of styles of conference bags nowadays.

Choose your style, be practical and modern.

THE WORLD'S FIRST TRAVEL AGENCY

The first travel agency in the history was the agency, called "Thomas Cook and The Sons". This travel agency still exists, but it has a bit different name, that is "Thomas Cook Group". Thomas Cook worked as a cabinet maker and part-time publisher of Baptist and Temperance pamphlets, becoming a Baptist minister in 1828. Cook's idea to offer excursions came to him while waiting for the stagecoach on the London Road at Kibworth. With the opening of the extended Midland Counties Railway, he arranged to take a group of 570 temperance campaigners from London Railway Station to a rally in Loughborough, eleven miles away. On 5 July, 1841, Thomas Cook arranged for the rail company to charge one shilling per person that included rail tickets and food for this train journey. During the following three summers he planned and conducted outings for temperance societies and Sunday-school children. In 1844 the Midland Counties Railway Company agreed to make a permanent arrangement with him provided he found the passengers. This success led him to start his own business running rail excursions for pleasure, taking a percentage of the railway tickets.

The Very First Forecast

Weather forecasting is the application of science and technology to predict the state of the atmosphere for a given location. People have been talking about the weather since time immemorial, but it wasn't until August 1, 1861 that someone finally decided to put his daily predictions into writing. On this day, Robert FitzRoy published his first, largely accurate, weather report. Alongside his teacher and fellow naval officer Francis Beaufort, Robert FitzRoy had begun working on the new science of meteorology in the 1840s. Vice-Admiral FitzRoy would later gain lasting fame as the captain of the Beagle during Charles Darwin's legendary voyage.

THE ORIGINAL CLOCK

Sundials are the first time measuring devices known to man. Created originally in Babylon over 6 thousand years ago, and developed into more functional state in Ancient Egypt, sundials became extremely useful analogue clock devices that remained in continual use for many thousands of years after, even managing to survive until today. Popularity of sundials in Egypt rocketed with the creation of the first obelisks – tall and slim stone structures whose shadow enabled easy reading of time from the circular segmented horizontal disc that was placed on the ground around it.

Penalties or referees found no place in the original rules of the game. Gentlemen would never intentionally foul, it was assumed. In fact, debating techniques were almost as important as ball skills in those days, as players could appeal against decisions first to captains and then to umpires before referees, named so because they had originally been referred to by umpires, only to find their place on the pitch in 1891.

PHARMACOLOGY

The birth date of pharmacology is not as clear-cut. In the early 19th century, physiologists performed many pharmacologic studies. Nevertheless, pharmacology is held to have emerged as a separate science only when the first university chair was established. According to Walter Sneader, this occurred in 1847, when Rudolf Buchheim was appointed professor of pharmacology at the University of Dorpat in Estonia (then a part of Russia).

Oswald Schmiedeberg (1838-1921) is generally recognized as the founder of modern pharmacology. The son of a Latvian forester, Schmiedeberg obtained his medical doctorate in 1866 with a thesis on the measurement of chloroform in blood. He worked at Dorpat under Buchheim, succeeding him in 1869. In 1872, he became professor of pharmacology at the University of Strassburg, receiving generous government support in the form of a magnificent institute of pharmacology.

In his 46 years at Strassburg, Schmiedeberg trained most of the men who became professors at other German universities and in several foreign countries. He was largely responsible for the preeminence of the German pharmaceutical industry up to World War II.

Broken mirror

The "broken mirror" superstition has been within Western society for more than a thousand years. It was first seen as a sign for "bad luck" and was noted in Rome. Additionally, at one point in the glorious history of the ancient city - state of Rome, making mirrors was a work of art like that of the buildings and statues that represented the gods and goddesses. Breaking mirrors would, therefore, constitute a huge offense.

Breaking the Bad Luck Spell

For those individuals who exclusively believe in the broken mirror premise, please do not despair. There is a way how to break the bad luck spell. To break it, you must wait for several hours before picking up the broken pieces. Each of these pieces of broken glass represents one bad luck year. Next, bury the pieces outside in the moonlight to finish the bad luck-riding task.

Mirror Use

Mirrors are an effective decorating tool and they could give a new look to your home. Placing them in front of a vanity or the entrance to a house, can enhance the light in a room, reflect candlelight, or make a space look larger than it is.

BUSINESS CARD TRENDS OF THE FUTURE

Business cards are probably the most popular tool for self and business promotion. Even before, people used business cards in various ways to creatively represent themselves or their business.

...

VISUAL CONTENT

Visual content is more important now than ever and leaving the back of a business card blank simply won't suffice. Use one side of the card to display an image of your product, or something related to your business.

QR CODES

An easy way to create a link between your printed and online content; by scanning the code, people can be sent directly to your website. This is a great space saver for business cards.

PREMIUM PAPER/UNUSUAL MATERIALS

Differentiate your business cards from the others by using premium paper. 350-400gsm will look and feel superior and also, give a great first impression of your business. In addition, using unorthodox materials such as metal, fabric or even edible can help ensure your business cards stand out from the competition.

Nikola Tesla

inventor, electrical engineer, mechanical engineer, physicist, and futurist best known for his contributions to the design of the modern alternating current (AC) electricity supply system.

Tesla UNIT (T)

The tesla (symbol T) is the SI derived unit of magnetic flux density, commonly denoted as B. One tesla is equal to one weber per square metre, and it was named in 1960 in honour of Nikola Tesla.

$$\begin{aligned} T &= V \cdot s / m^2 = N / A \cdot m = J / A \cdot m^2 = \\ &= H \cdot A / m^2 = Wb / m^2 = kg / C \cdot s = \\ &= N \cdot s / C \cdot m = kg / A \cdot s^2 \end{aligned}$$

A = ampere
C = coulomb
kg = kilogram
m = meter
N = newton
s = second

H = henry
T = tesla
V = volt
J = joule
Wb = weber

Mount Everest facts

- Mount Everest, also known in Nepal as Sagarmāthā and in Tibet as Chomolungma, is Earth's highest mountain
- It is located in the Mahalangur section of the Himalayas
- Everest is 8848 meters high
- Its peak is 5th furthest summit from the center of Earth
- The international border between China and Nepal runs across the precise summit point
- It is over 60 million years old
- Everest was formed by the movement of the Indian tectonic plate pushing up and against the Asian plate
- Everest grows by about 0.635 cm every year
- It consist of different types of shale, limestone and marble
- The rocky summit is covered with deep snow all year long
